СИСТЕМЫ ИСПАРЕНИЯ И КРИСТАЛЛИЗАЦИИ COMRACON

Технические характеристики

CompaCon® FF Series

Falling Film Evaporator
50-3000 l/h Range

Gentle treatment with high energy efficiency

The CompaCon® FF Series is a Falling Film evaporator suitable for food production as well as chemical and wastewater-treatment applications.

On its XS size, the CompaCon® FF Series can act as pre-concentrator for a GEA Mobile Minor Spray Dryer, boosting the powder production up to five times and giving the powder a finish closer to that of an industrial plant.

Sizes XS, S and M of the CompaCon® FF Series can be powered with thermal energy by means of a Thermal Vapor Recompressor (TVR). With more than 90 years of experience on thermal technology and TVR production from GEA Wiegand backing its quality.

Additionally, on its M and L sizes, the CompaCon® FF Series can be powered with a Mechanical Vapor Recompressor (MVR), the latest steam-free development of small-scale MVRs. Driven solely on electrical energy, guarantees a reduced CO₂ footprint.

All relevant components of the CompaCon® FF Series are already installed in two modules, meeting the standards for container transportation and making its assembly possible within a day. The modules come with a field checked electrical installation to get the CompaCon® FF Series up and running in the shortest time.

CompaCon® FF Series

CompaCon® FC Series

Forced Circulation Evaporator
50-1500 l/h Range

Heavy duty. Compact measures

The CompaCon® FC Series is a Forced Circulation evaporator best suited for working with highly viscous liquids and insoluble containing products, apt for not only food production but chemical and waste-water-treatment applications as well.

Available on sizes S and M, the CompaCon® FC Series can be powered with thermal energy by means of a Thermal Vapor Recompressor (TVR). With over 90 years of thermal technology and TVR production experience from GEA Wiegand backing it.

The CompaCon® FC Series comes in one piece, already fully mechanically and electrically assembled, ready for the utilities to be plugged in.

The unit, fully checked and pre-commissioned with water, can be shipped in one sea freight container.

Steady Concentrate Control

The special logic-control of the CompaCon® FC Series, guarantees the plant to run on the desired concentration. Only compliant end-product will be discharged. Any deviation from the ideal concentration will stop the discharge until the desired concentration is reached again.

The discharge will be continuous for big discharge rates and intermittent for small ones.

CompaCon® FC Series

Integrated Solution

Hover over the blue dots to reveal the optional features

1. Product inlet with distribution pan
2. Heating option: TVR / MVR
3. Calandria
4. Centrifugal separator
5. Pump & Valves
6. High-end instrumentation
