СИСТЕМЫ ДОЕНИЯ IC330, ICIP Технические характеристики

iC330

iC330 High Performance Cluster

The iC330 has been designed especially to meet the needs of high-yielding, fast milking animals.

Although large in capacity, the size, overall weight and width of the claw has been kept to a minimum. This allows express attachment to the udder through the back legs or from the side.

The key features have been achieved through modern sleek styling of both the claw bowl and stainless steel top.

The iC330 claw is protected from its harsh working environment through high tech and robust plastic mouldings with a well placed protective bumper.

Cluster Accessories

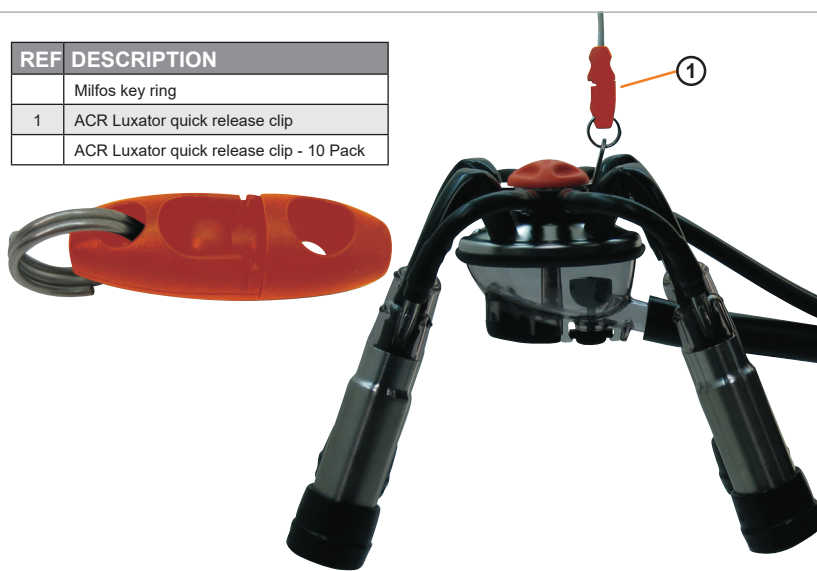

Milfos Luxator Quick Release Clip

The Milfos Luxator quick release clip was developed to provide a reuseable breakaway point on the rope between the ACR ram and the cluster.

This prevents damage to equipment if a cluster gets caught.

It is made of high tech plastics and when it breaks away can be reassembled by inserting the ball end in the cavity and then locking it back in place. It is attached to the cluster by a heavy duty stainless steel ring.
