СИСТЕМЫ УПАКОВКИ И РАЗЛИВА TIROLABEL PLUS Технические характеристики

General info

Left or right, top or bottom, complicated or simple. No problem for TiroLabel® from GEA. TiroLabel® from GEA labels sealed packs optionally on the top or on the bottom web. The TiroLabel® is available with maximum backing paper widths of 150 or 200 mm and labels the most sophisticated packs on a multi-track line with millimeter precision.

- TiroLabel® units from GEA are tailored solutions.
- Printing, dispensing and the accurate application of labels.
- Works perfectly with labels in diverse designs and formats.

Working principle

Regardless of the packaging system, all labelers in the TiroLabel® family are characterized by exact positioning every time. A special pressing device guarantees optimal placement accuracy even on uneven surfaces.

- A positioning unit utilising a great number of spring-loaded pins guarantees accurate placement
- Accurate placement while preventing damage to the packages
- Special pressing device guarantees optimal fitting accuracy even on uneven surfaces preventing labels from peeling off of the packs

Performance

High precision even at a speed of 200 labels a minute

- No-Downtime, Split Formator, Twin Function executions take care of fulfilling all production speed requirements.
- Easy access to the rewound backing material prevents line stops.
- Maximum 150/200 mm label width.
- Touch Screen (user friendly operation screen)
- Additional, local keypad for a quick access to the standard functions

Output quality

Regardless of the packaging system, all labelers in the TiroLabel® family are characterized by exact positioning every time. A special pressing device guarantees optimal placement accuracy even on uneven surfaces.

- Depending on the design, TiroLabel® processes labels up to a width of 200 mm quickly and precisely.

Flexibility

Together with GEA Thermoformers, Traysealers and FlowPackers the TiroLabel® family comprises optimally integrated and extremely user-friendly units. The TiroLabel® is available with maximum backing paper widths of 100, 150 or 200 mm. All commonly applied printing technologies (such as rotary, thermotransfer, hot-foil printing, ink jet, etc.) are optionally available for this purpose. TiroLabel® can also be integrated into existing packaging systems of other manufacturers.

- Easy operation and programming.
- GEA TiroLabel® allows you to change label reels during machine operation.
- The modular design simplifies maintenance.
- GEA TiroLabel® guarantees trouble-free mounting on almost all commercially available automatic packaging machines.

Reliability

Positioning principle adapts to any kind of surface, a particular advantage when labelling bottom film. The result is more than presentable: one hundred percent uniformly labeled brand products every time.

- Unusual labels can also be positioned quickly and reliably.
- The drive with microprocessor control not only provides for maximum speed, but also for smooth and nearly maintenance-free operation

Hygiene

All labelers in the TiroLabel® family are units made of stainless steel and aluminum. Every machine meets the highest hygiene requirements.

- Wipe-down execution.
- No high pressure water to be used for cleaning of TiroLabel®.

Safety

TiroLabel® construction fulfills all safety guidelines, creating very safe and user friendly environment.

- Local E-stop for immediate stops of entire system (including Thermoformer)

Controls

Software system for monitoring, controlling and optimising gives you total control over your production process.

- Available in B&R control system.
- Modern user interface simplifies day-to-day operation, parameter set-up and faultfinding process.
