Поршневые компрессоры GEA серии SP1, SP2, SPduo

Технические характеристики

GEA Grasso SP1

Efficient. Reliable.

Versatile.

Screw compressor

- High efficient and compact design
- GEA specified rotor profile for industry leading COP
- Sleeve bearings: Infinite lifetime and inherently quiet

Suction Filter Combination (SFC)

- Gas operated check valve for better COP
- No chatter at low flow rate
- Low pressure loss
- Reduced leakage risk

Enhanced safety measures

- Multi-stage safety chain for over pressure protection
- 3D-formed pipes reducing welding seams
- Continuous data monitoring with safety stop

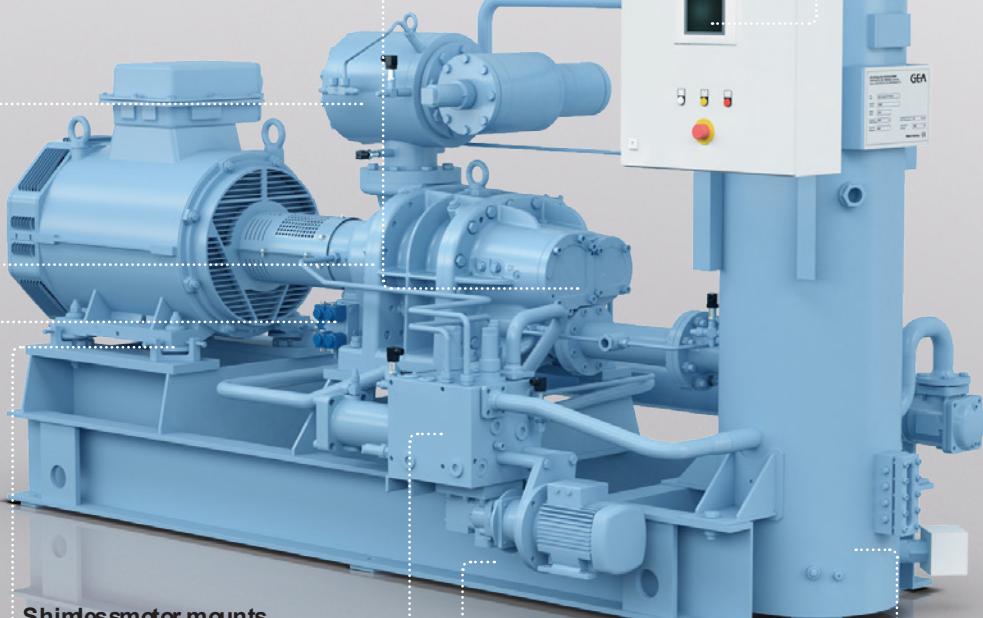

Compressor axial bearings

- Easy to replace
- Easy access from non drive end

Control unit GEA Grasso GSC TP

- User-friendly touch panel
- Ensures high plant availability
- Remote access via web browser
- Maintenance logs and full data history

Shimless motor mounts

- Easy and accurate motor alignment

Compressor capacity and Vi control

- Infinite capacity and Vi control for efficient operation in full and part load
- Capacity control via frequency inverter and/or capacity slide

Stable base frame

- Low noise and vibration level
- Longer lifetime of package components
- Service-friendly working height
- Low center of gravity

Oil Management Center (OMC)

- Centralized working area
- Reduced leakage risk
- Closable sections for easy service

3-stage oil separator

- Low oil charge
- Maximum 5 ppm oil carry over
- Reduced operating costs

GEA Grasso SP1 – Efficienct, reliable, versatile

The single-stage series GEA Grasso SP1 is designed for medium to the largest capacity requirements and, thanks to the flexible set-up, for highly individual needs. Available are 16 models from 638 kW to 9,311 kW refrigeration capacity (R717 | -10 / +35 °C | 3,600 rpm).

With components fitted on a stable base frame, the packages operate at low noise and vibration levels and allow easy and comfortable access and service – a crucial advantage particularly for large capacities and large-sized components. The design also allows a multitude of options so that clients can customize the package to their individual needs, making the GEA Grasso SP1 series particularly attractive for its versatility.

The 16 models normally are all fitted with a vertical oil separator. Out of this range the first 9 models (638 to 2,667 kW) are also available in a more compact horizontal oil separator design (driveline mounted on top). This version, GEA Grasso SP1 horizontal, is more standardized but offers 15 to 20 % footprint reduction compared with its vertical counterpart – ideal for R717 standard applications where machine room space is limited.

High pressure version GEA Grasso SP1 HP The SP1 HP (=high pressure) line is specifically designed for:

- R717 heat pump applications providing heating temperatures up to +85 °C.
- R744 freezing applications, with evaporation temperatures as low as -54 °C

Thanks to the robust high-pressure screw compressor design (52 bar), high differential pressures and temperatures are possible for combined cooling and heating applications or for running a CO₂ package at plus-condensing-temperatures in a defrosting mode.

At a glance

- Widest temperature and application range
- Refrigeration capacities over 9 MW
- Versatile design from standards to high customization degrees

UNIQUE FEATURES AND ADVANTAGES:

1. Efficient screw compressor

- Highly efficient, compact design
- GEA-specified rotor profile for industry-leading COP
- Sleeve bearings: infinite lifetime and inherently quiet
- Axial bearings: easy to replace, easy access from non-drive end

5. -stage oil separator

- Low oil charge
- Maximum 5 ppm oil carry-over
- Reduced operating costs

2. suction Filter Combination (SFC)

- Gas-operated check valve for better COP
- No chatter at low flow rate
- Low pressure loss, reduced leakage risk

6. il Management Center (OMC)

- Centralized working area
- Reduced leakage risk
- Closable filter for easy service

3. GEA Omni™ control panel

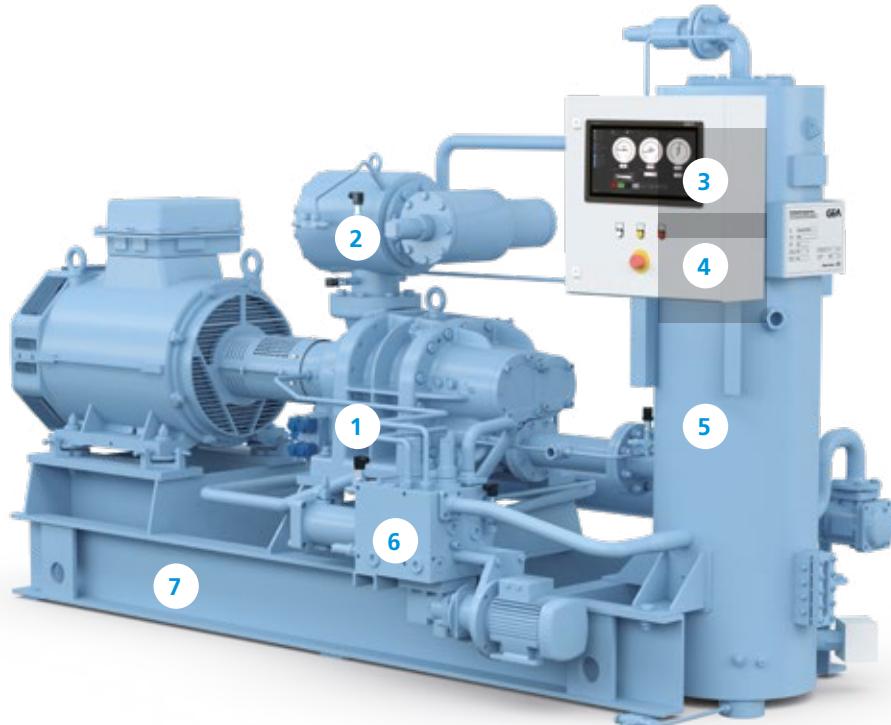

- High definition 15.6" display (1,366 × 768 pixel)
- Remote access via GEA OmniLink™
- Full data history via GEA OmniHistorian™
- Configurable Modbus TCP Ethernet communication

7. sturdy base frame

- Low noise and vibration level for extended component lifetime
- Service-friendly working height
- Low center of gravity

4. capacity and Vi control

- Capacity control via frequency inverter and / or capacity slide
- Infinite capacity and Vi (internal volume ratio) control for efficient operation in full and part load

GEA Grasso SP2 – The high performer

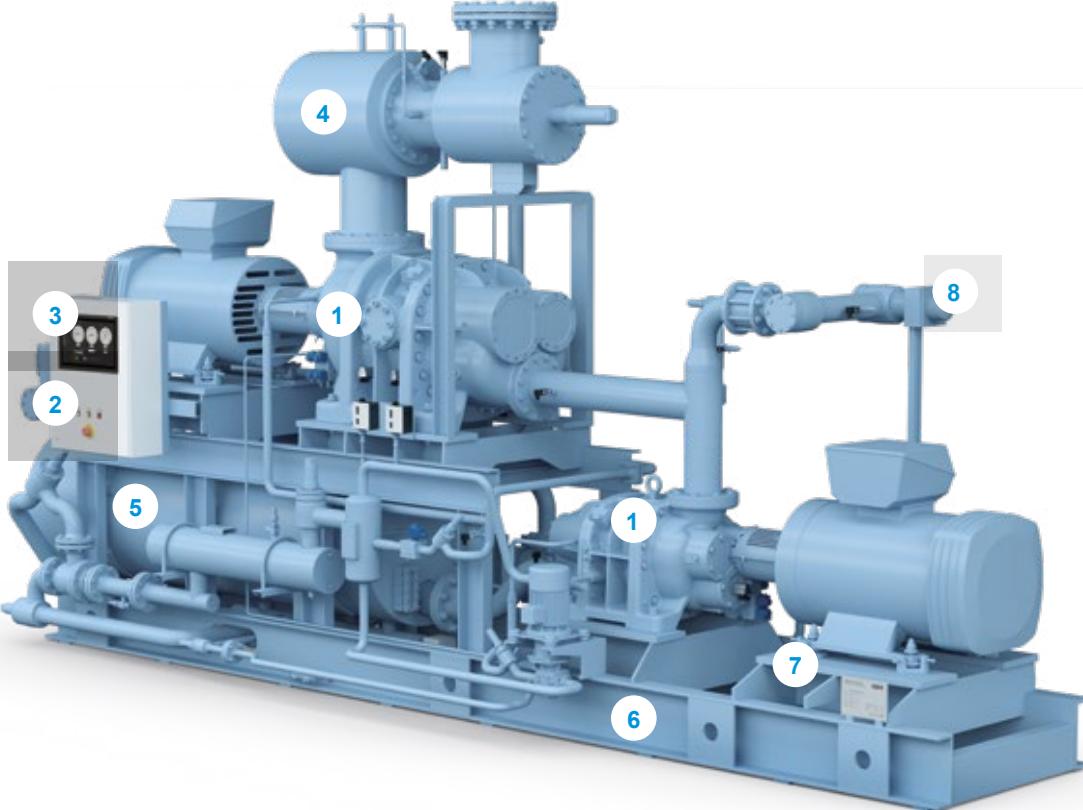

Designed for low evaporation temperatures and high temperature increases/high differential pressures, the two-stage screw compressor packages in the GEA Grasso SP2 series each include two serially mounted compressors for a low- and a high-pressure stage. Combined with intermediate load connection the package ensures most flexible and individual operation.

The series contains 18 package sizes (18 different low-stage screw compressors in combination with various high-stage compressors) and ranges from 95 to 1,770 kW refrigeration capacity (R717 | -40 / +35 °C | 2950 rpm).

A GEA Grasso SP2 package is the most efficient and flexible solution for high differential pressure operation. At the same time the package, based on a common base frame, oil circuit and common control, is easier to operate and requires less space than two separate single-stage packages.

At a glance

- Optimized for low temperatures and high differential pressure operations
- Flexible and individual operation of low-stage and high-stage compressors as well as intermediate load connection
- Common base frame, oil circuit and control for easy operation and minimized footprint

UNIQUE FEATURES AND ADVANTAGES:

1. Efficient screw compressors

- Highly efficient, compact design
- Proprietary rotor profile for industry-leading COP
- Sleeve bearings: infinite lifetime and inherently quiet
- Axial bearings: easy to replace, easy access from non-drive end

2. Capacity and Vi control

- Infinite capacity and Vi (internal volume ratio) control for efficient operation in full and part load

3. EA Omni™ control panel

- High-definition 15.6" display (1,366 × 768 pixel)
- Remote access via GEA OmniLink™
- Full data history via GEA OmniHistorian™
- Configurable Modbus TCP Ethernet communication

4. suction Filter Combination (SFC)

- Gas-operated check valve for better COP
- No chatter at low flow rate
- Low pressure loss

5. -stage oil separator

- Low oil charge
- Maximum 5 ppm oil carry-over
- Reduced operating costs

6. common base frame

- Low noise and vibration level
- Service-friendly working height
- Low center of gravity
- Reduced package footprint and operating costs in comparison with single-stage packages

7. himless motor mounts

- Easy and accurate motor alignment

8. intercooler connection

- Increased efficiency
- Additional intermediate load possible

GEA Grasso SPduo – Best efficiency with all loads

The packages in the GEA Grasso SPduo series feature two parallel-mounted screw compressors each. This solution is especially suited for part-load efficiency, flexible (part-load) operation and all applications where demands for machine availability and redundancy are most important.

Both screw compressors in the unit can be operated independently or at the same time in parallel to achieve top-level loads. You can equip one screw compressor with a variable speed drive motor and frequency converter to achieve part-loads down to 12% without significant efficiency losses!

Compared to two separate single-stage packages, the GEA Grasso SPduo package requires less space, thanks to the common base frame, oil circuit and control, and it is also easier to operate. The SPduo series consist of 15 models with a capacity range from 262 to 3,170 kW (R717 | -40/+35 °C | 2950 rpm).

At a glance

- Optimized for highest efficiency in all load conditions
- Maximum machine availability, flexibility and redundancy – parallel or independent single compressor operation possible
- Common base frame, oil circuit and control for easy operation and minimized footprint

UNIQUE FEATURES AND ADVANTAGES:

1. Efficient screw compressors

- Highly efficient, compact design
- Proprietary rotor profile for industry-leading COP
- Sleeve bearings: infinite lifetime and inherently quiet
- Axial bearings: easy to replace, easy access from non-drive end

2. EA Omni™ control panel

- High-definition 15.6" display (1,366 × 768 pixel)
- Remote access via GEA OmniLink™
- Full data history via GEA OmniHistorian™
- Configurable Modbus TCP Ethernet communication

3. Capacity and Vi control

- Infinite capacity and Vi (internal volume ratio) control for efficient operation in full and part load
- Capacity control via frequency inverter and / or capacity slide

4. -stage oil separator

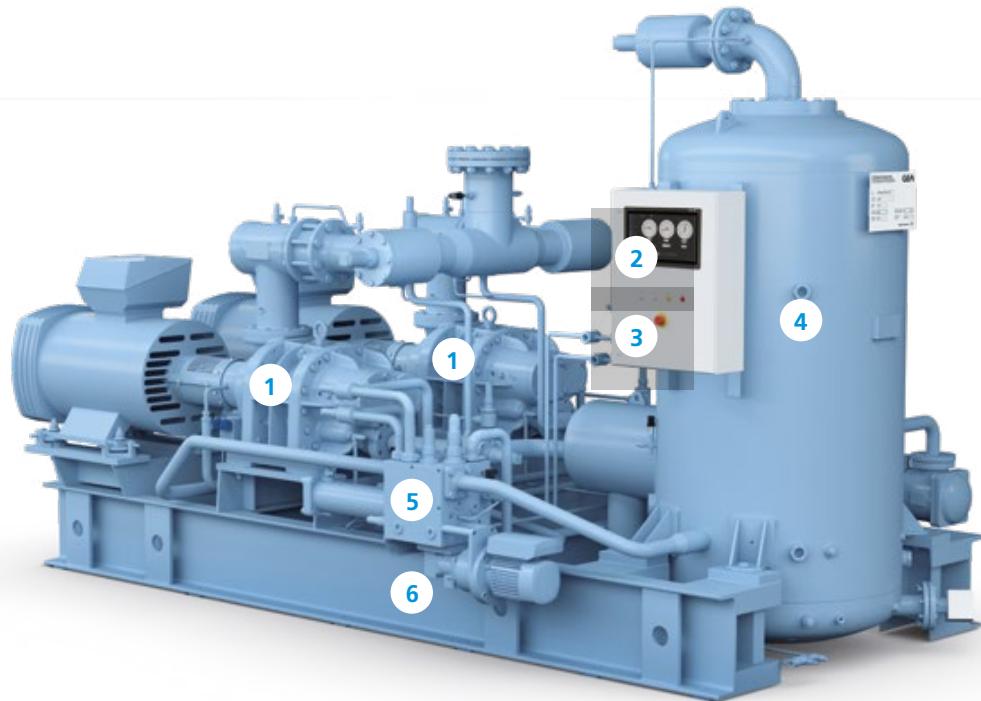

- Low oil charge
- Maximum 5 ppm oil carry-over
- Reduced operating costs

5. Oil Management Center (OMC)

- Centralized working area
- Reduced leakage risk
- Closable filter for easy service

6. Common base frame

- Reduced package footprint
- Low noise and vibration level
- Service-friendly working height
- Low center of gravity
